

## Chapter 1. Installation.

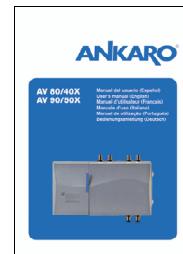

### 1.1. Safety measures

- 1.- Never place the equipment next to hot sources.
- 2.- Never undergo the equipment to temperatures that exceed the level of operation of the device.
- 3.- Do not expose the equipment to dripping or splashing.
- 4.- Do not place objects filled with liquids on the equipment.
- 5.- Respect ventilation slots of this equipment. Avoid covering them with any object.
- 6.- Keep clean and without obstacles a minimum radius of 40 cm around this equipment.
- 7.- Avoid locations with possibilities of spilling liquids on the inside of the device, and with important changes of temperature.
- 8.- Never open the equipment yourself due to electric risk. In case of problems, go always to qualified technicians.
- 9.- Never, under no circumstances, open the equipment connected to the electrical net.
- 10.- During the handling it is better to disconnect the equipment of the electrical net.
- 11.- Respect the electricity security rules during the assembling. Use materials that obey the current law.
- 12.- The connecting plug must be accessible in a fast and simple way to have a fast disconnection.
- 13.- Never touch the plug with wet hands. Also, disconnect always the device before handling the connections.
- 14.- Never put any heavy object over the device, as it could get damaged.
- 15.- If the equipment is going to remain some time without use, it is recommendable to disconnect it from the electrical net.
- 16.- The repairmen and the maintenance of the equipment must be done by TV and radio specialist technicians.

### 1.2. Box content

AV 80/40X - AV 90/50X

User's guide

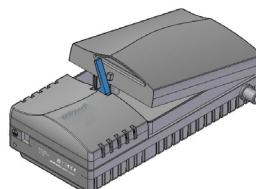

### 1.3. Description and connections

The main feature of wideband amplifiers AV 80/40X - AV 90/50X is the possibility of configuring the amplified bands through plug-in filters.

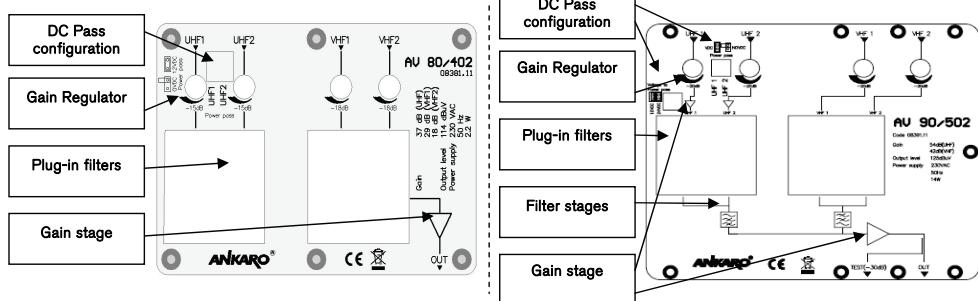

The difference between the different models is the number of inputs and the gain. The maximum output level for models AV 80/40X is 114 dBuV and for models AV 90/50X it is 125 dBuV.

The configuration of each input is made through connectable filters that are situated inside the amplifier; these inputs have a filter by default that allows the complete band to get through. The VHF 2 input of all the models will not have any filter and the installer himself will choose if he wants to use it or not.

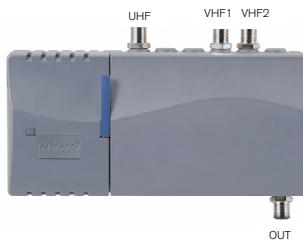

The UHF inputs have jumpers that allow feeding preamplifiers in cases where the installation needs it. These amplifiers are provided with a hermetic frame made of aluminium with a removable cover that allows the installer to configure the amplifier according to the needs of each installation.

Inside the device there is a simplified sketch that shows the different stages of the amplifier and also the access to configure the different options that it offers is provided.

### AV 80/40X Main Features

AV 80/401

AV 80/402

The gain in AV 80/40X models in UHF is 41dB and 37dB depending on the model. In VHF the gain is 30dB for VHF1 and 18dB for VHF2.

The regulation for UHF is 15dB and for VHF is 18dB.

The maximum output level of these models is 114dBuV.

### AV 90/50X Main Features

AV 90/501

AV 90/502

The gain in AV 90/50X models in UHF is 56dB and 54 dB depending on the model. In VHF the gain is 44dB in both models.

The regulation is 20dB for UHF and VHF in all the models.

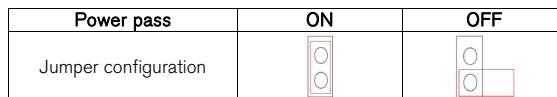

The maximum output level of these models is 125dBuV.

These models are provided with a Test output of -30dB.

## Configuration of pre-amplifiers feeding

The configuration of pre-amplifiers feeding is made through jumpers, depending on the model it will feed one or two UHF inputs.

Models	AV 80/401	AV 80/402	AV 90/501	AV 90/502
UHF inputs with pre-amplifier feeding	1	2	1	2

The AV 90/50X models give the possibility of feeding the pre-amplifier in 12VDC or in 24VDC, while the AV 80/40X models can only feed in 12VDC.

Feeding	12VDC	24VDC
Jumpers configuration AV 90/50X		

## Installation

The equipment is provided with a wall support with wedges and screws included.

The steps to make a correct installation are the followings:

- Bring down the fastening device. The equipment will be now loosened and it will be possible to separate the support from the equipment.
- Fix the support to the wall with the wedges and screws provided.
- Introduce the equipment again in the wall support once it is installed.
- Bring up the fastening device to adjust the equipment to the support.

## AV 80/40X - AV 90/50X

- 1-2 UHF IN: Terrestrial signal input UHF 470-862 MHz  
 3-4 VHF IN: Terrestrial signal input VHF 47-230 MHz  
 5 TEST OUTPUT: Test output (-30dB) (only AV 90/50X)  
 6 OUT: Terrestrial signal output UHF+VHF 47-862MHz  
 7 AC IN: Feeding cable ( 230V AC, 50Hz )

## 1.4. Accesories and example of installation

### Accessories

Internal plugable filters

#### BI Filter

Mod. B1F

Code 08300.BI

#### FM Filter

Mod. FMF

Code 08300.FM

#### BIII Filter

Mod. B3F

Code 08300.B3

#### DAB Filter

Mod. DABF

Code 08300.DAB

#### BIV Filter

Mod. B4F

Code 08300.B4

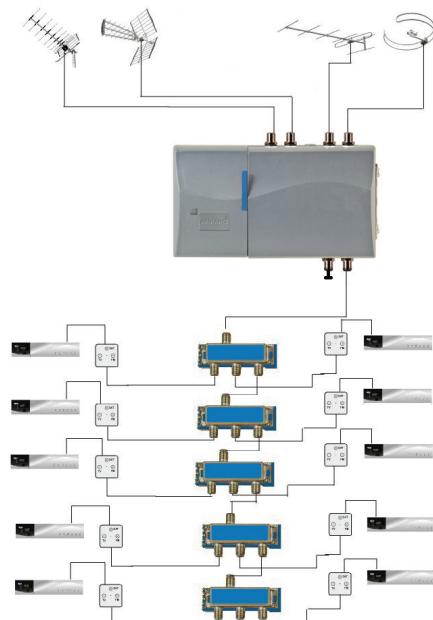

#### BV Filter

Mod. B5F

Code 08300.B5

### Example of installation

Example of an installation of a 5-floors-building with two dwellings per floor. The UHF + VHF signals are distributed in each outlet. The amplifier allows regulating the signal and configuring the different bands of each input through plug-in filters, this way we can get to the different outlets with optimum signal level.

## Chapter 2. Technical features

Ref.	AV 80/401	AV 80/402	AV 90/501	AV 90/502
<b>Code</b>	08380.11	08381.11	08390.11	08391.11
<b>Number of UHF inputs</b>	1	2	1	2
<b>Number of VHF inputs</b>		2		2
<b>Number of outputs</b>		1		1
<b>Test output (-30dB)</b>	-			1
<b>UHF frequencies margin</b>			470-862 MHz	
<b>VHF frequencies margin</b>			47-230 MHz	
<b>UHF Gain</b>	41 dB	37 dB	56 dB	54 dB
<b>VHF1 / VHF2 Gain</b>		30/18 dB		44 dB
<b>UHF Regulation</b>		15 dB		20 dB
<b>VHF Regulation</b>		18 dB		20 dB
<b>Maximum output level</b>		114 dB $\mu$ V		125 dB $\mu$ V
<b>Pre-amplifiers feeding (UHF)</b>		12 V		12/24 V
<b>Protection grade</b>		IP 40		IP 65
<b>Consumption</b>		230V, 50Hz, 2.2W		230V, 50Hz, 14W
<b>Measures</b>		175 x 50 x 98 mm		230 x 140 x 60 mm

## Chapter 3. Conformity declaration

## CONFORMITY DECLARATION

"WE , ANKARO, DECLARE THAT THE PRODUCTS  
 AV 80/401, AV 80/402,  
 AV 90/501 AND AV 90/502  
 ARE IN CONFORMITY WITH FOLLOWING DIRECTIVES  
 Low Voltage Directive 2006/95/EC  
 EMC Directive 2004/108/EC"

If you wish a copy of the conformity declaration, please contact the company
